STICK ON FASHION! STICK WITH PASSION!

STICKER, NOW IN LEATHER!

2026 / DIGITAL EDITION

Stick on fashion. Stick with passion.

A leather-like touch. A new way to make everyday objects feel like you.

PopSticker combines dimensional PU stickers with colourful artwork, expressive characters and small everyday stories. Explore the collections, find your favourites and make them part of your own accessory universe.

Browse all 68 designs

STICKER, NOW IN LEATHER!

Dimensional decorative stickers with a leather-like surface and adhesive backing.

PU LEATHER

A leather-like finish with a dimensional feel.

ADHESIVE BACKING

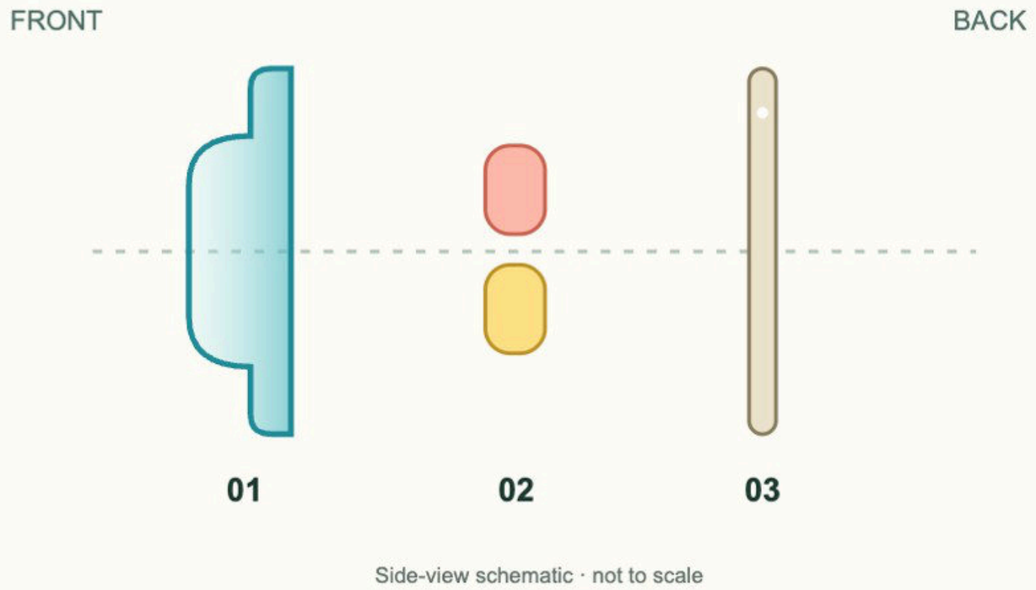
Designed to personalise your everyday accessories.

YOUR OWN EXPRESSION

Original artwork, colourful details and collectible series.

PopSticker packaging explained.

Three parts, ready to display.



01 · Clear PET shell

A transparent outer shell keeps the designs visible.

02 · Dimensional PU stickers

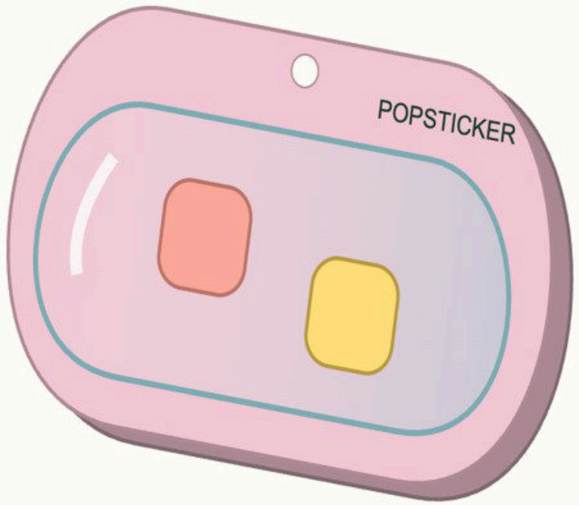
Leather-like texture with adhesive backing. Designs and sticker count vary by style.

03 · Printed backing card

A double-sided printed paper backing card with a hanging hole. The front provides the product background; the reverse carries product information and branding.

Clear PET shell / dimensional PU stickers / a double-sided printed paper backing card.

One backing card. Printed on both sides.



Front · three-quarter view (approx. 45°)

Clear PET shell in front; the printed front face of the backing card is visible behind the stickers.

Back · reverse view

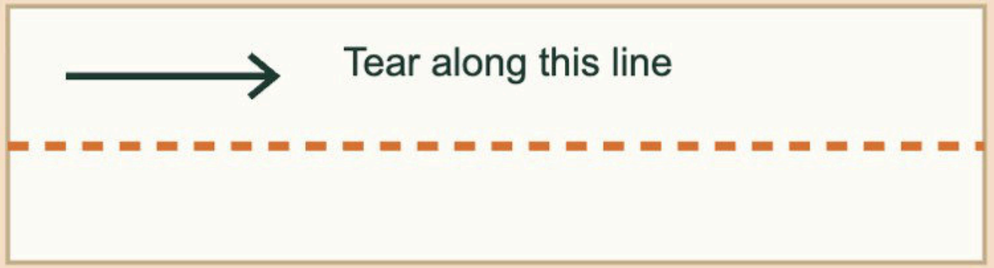
The reverse is printed too. This is the other side of the same backing card, not an extra insert.

Tear along the perforated line.

HOW TO OPEN

TEAR ALONG THE PERFORATED LINE.

Locate the perforated line on the packaging and tear along it to open.



Perforation detail · line position is not mapped in this schematic

The front face provides the background behind the stickers. The reverse carries product information and branding.

Schematic views are not to scale. The illustration explains the opening action; it does not map the exact perforation location on the pack.
